

MICROPHONES

FACT SHEET

Take the hassle out of Q&A sessions with the Communicator's built-in microphone system.

Every Communicator keypad features a built-in microphone, ensuring all audience members are given an equal opportunity to speak at events.

Microphones can be activated simply by pressing a button on the keypad and speaking into it in the same way that you would use a mobile phone.

The system replaces the need for roving microphones and speeds up Q&A sessions, providing more participants with the opportunity to speak.

FLEXIBLE

Microphones can be activated and deactivated instantly at any stage of your event, giving you greater control over live discussions and Q&A sessions.

FAIR

The system operates on a first-come, first-served basis, allowing for a fairer, more balanced Q&A session.

COST EFFECTIVE AND EFFICIENT

Participants have instant access to a personal microphone, removing the need to employ assistants with roving microphones. Q&A sessions are accelerated, as participants do not have to wait for a microphone to reach them.

ADDED VALUE

The Communicator keypad combines audio with instant voting, enabling you to gauge audience opinion by holding live votes on subjects raised during Q&A sessions.

MICROPHONES

PRESS TO TALK

Participants activate their microphone simply by pressing a button on the Communicator. The first person to activate their microphone will be the first to speak.

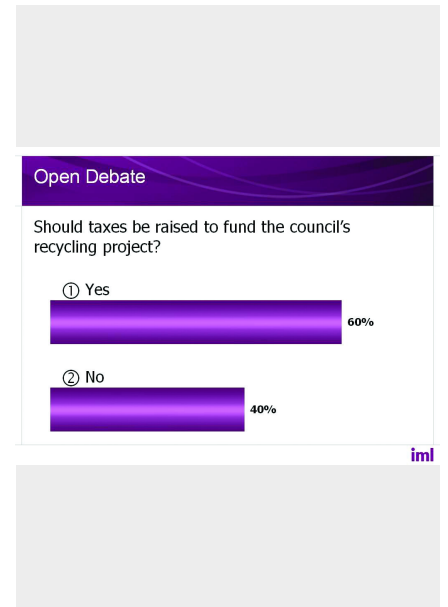

TALK

When a participant is speaking, all other microphones are deactivated to prevent interruption from other audience members.

VOTE ON SUBJECTS RAISED

Gauge audience opinion on subjects raised during Q&A sessions by getting them to vote with their Communicator keypad.

DISPLAY RESULTS

Display instant results live to your audience to generate further debate and discussion.
